About me

Electronic Health Records (EHRs) offer a huge set of observations that can generate real-world evidence. However, these valuable data often remain unexploited, and I believe there is significant untapped potential within them.
I am eager to explore bioinformatics techniques combined with NLP tools to gain insights from these data. I find the interdisciplinary nature of medical informatics and collaboration with experts from various fields enriching.
Being a team player, I enjoy actively contributing to a group's efforts. Outside of work, you can find me dancing or hiking.

Programming Languages

R, Python

Query Languages

SQL, SPARQL

Research Expertise

Knowledge graph, Survival analysis, Statistical learning, Text mining

Hobbies

Modern jazz
Hiking

Education

2017-2019 MSc in Bioinformatics *Université Paris-Saclay*

2016-2017 BSc in Organism Biology and Ecology *Université Paris-Saclay*

Professional experiences

Since December 2020 **PhD on the detection and prediction of chemotherapy responses from EHRs.** *Inserm-Inria HeKA Team*
Clinical data warehouses hold important information about chemotherapies and their effects, but it's often scattered and hard to interpret. To make use of this valuable data, I developed two knowledge graphs called OntoTox [3] and ChemoOnto [1, 4]. These graphs helped me organize and analyze the information effectively. Using these frameworks, I compared standardized and actual chemotherapy regimens. Leveraging these comparisons, I am currently working on predicting chemotherapy responses.

November 2019 - December 2020 **Research Engineer** *Inserm, Paris Georges Pompidou hospital*
I took part in the QualiHealth project aimed at improving the quality of healthcare data. I developed text mining tools to extract information from medical narrative reports during COVID crisis. [2]
I helped in the realisaton of OntoDol. [5]

March-August 2019 **Intern** *Inserm, Paris Georges Pompidou hospital*
High-Throughput Phenotyping for glomerular diseases

July-August 2018 **Intern** *Parasitology Unit of the Center Dr. Hideyo, Mexico*
Identification of blood meals from *Triatomia dimidiata* in the Yucatán.

June-August 2017 **Intern** *EcoSys laboratoty, INRA.*
Characterization of metal contaminations in urban farm soils.

Teaching

Falls 2021 and 2022, 48h **Supervisor for Practical Work (L1)** *Université Paris Cité*
Supervision of practical work for first-year MIASH (Applied Mathematics for Social Sciences) students.

Spring 2023, 24h **Supervisor for Practical Work (L2)** *Université Paris Cité*
Supervision of 6 groups of 4-5 students in the second year of computer science, working on GUI (Graphical User Interface) projects based on two topics that I have written.

Spring 2022, 24h **Supervisor for Practical Work (L3)** *Université Paris Cité*
Supervision of database practical work for third-year computer science students (L3).

Talk and events

Type	Event	Date
Poster	AI4Health 2021	04/01/2021
oral presentation	HeKA team meeting	15/02/2021
oral presentation	HeKA team meeting	13/09/2021
Poster	CRC scientific day	23/09/2021
Article and oral presentation Second Best Student paper	MedInfo 2021	02/10/2021
Poster	AI4Health 2022	12/01/2022
oral presentation	Bernoulli Lab kick-off (APHP-Inria)	22/03/2022
oral presentation	CRC scientific day	22/09/2022
Poster	ISMB/ECCB 2023 Lyon	25/07/2023
oral presentation	ISMB/ECCB 2023 Lyon	25/07/2023
